MARINE SECURITY BULLETIN – 12/2024

Dear Shipowners, Operators and Masters

Subject: Missile attacks resume in Gulf of Aden

After a pause in attacks over the last few weeks there has been a string of attacks on commercial vessels in the Gulf of Aden and surrounding waters. On April 6, a container ship was targeted by two missiles about 60 NM southwest of the Yemeni port of Hodeidah. Military forces operating in the area intercepted the first missile, while the second impacted the water a short distance from the vessel's port quarter. The vessel was not damaged and there were no casualties among the crew. Two other vessels were also targeted, but specific details of the attacks are not confirmed.

Security Level

Liberian flagged vessels transiting the Red Sea, Gulf of Aden, Northern Indian Ocean and Arabian Sea are to increase their security level to security level 3 and implement all protective measures in their Ship Security Plan. In addition, Liberian flagged vessels should avoid calling ports in Yemen. The decision to transit remains at the discretion of the Company, considering the number of recent targeted attacks on commercial ships.

Recommendations

The Liberian Registry encourages all vessels transiting the Red Sea to report to the UKMTO and register with the Maritime Security Centre for the Horn of Africa (MSCHOA) in accordance with industry BMP (Best Management Practices) and take advice from the collation forces operating in the area. Best Management Practices 5 (BMP5) will continue to provide the necessary guidance for shipping to ensure threat and risk assessments are developed for every voyage to mitigate the risks presented by remaining security threats in the region. The shipping industry will continue to monitor and advise on maritime security threats to assist the safe transit of vessels and the seafarers.

When operating within territorial seas or calling ports within the previously defined HRA as shown on UKHO Chart Q6099, Masters shall set the vessel security level to the level set by the port State authority but may implement security measures in excess of the security level set by the port authorities based on their assessment of the conditions in the port. When operating outside territorial seas or ports within the previously defined HRA shown on UKHO chart Q6099, all

Liberian flagged vessels shall operate at security level III. All security level changes should be reported directly to the Flag Administration by the Master via email security@liscr.com.

The Liberian Administration strongly recommends that Vessels Owners, Characters, Operators and Ships Masters continue to carry out pre-voyage threat and risk assessments to consider the latest maritime security information from organizations supporting the Voluntary Reporting Area. In addition, Liberian flagged vessels may consider using a Private Maritime Security Company (PMSC) to provide additional armed or unarmed security personnel while transiting the high-risk area.
